

SUMMARY

Recent Master of Public Health (MPH) graduate with a proven track record in health policy analysis, biomedical research, and emergency medical care. Skilled in conducting detailed legislative analyses, leading advocacy efforts, and fostering partnerships to drive impactful public health initiatives. Adept at managing complex research projects, analyzing quantitative data, and developing innovative solutions in high-pressure environments. Committed to advancing public health equity and improving community health outcomes through evidence-based strategies and collaborative efforts. Proven ability to communicate effectively with diverse stakeholders and contribute actionable insights to dynamic teams.

WORK EXPERIENCE

Ayaan Hirsi Ali (AHA) Foundation

Policy and Women's Program Analyst Intern

Bethesda, MD
May 2023 – May 2024

- Analyzed state and federal legislation on Female Genital Mutilation (FGM) and child marriage (CM), producing legal guides for survivors.
- Led legislative advocacy efforts, contributing to the passage of key policies to combat FGM and CM through training sessions and collaborative initiatives.
- Established partnerships with nonprofit organizations and government agencies, resulting in increased policy influence and outreach for the AHA's mission.

University of Maryland, School of Medicine, CBOTH

Research Specialist

Baltimore, MD
June 2021 – May 2024

- Improved hypoxia tolerance in the lab through comprehensive research on hypoxic preconditioning and pharmacological methods.
- Played a key role in the development of ErythroMer, a pioneering blood substitute aimed at enhancing the resuscitation outcomes of combat casualties.
- Designed and executed high-impact in-vivo experiments, including hemorrhagic shock models and bioluminescence analysis, leading to valuable insights into ErythroMer's efficacy.
- Administered complex drug dosing and conducted thorough blood analyses, advancing preclinical research on novel treatments.
- Managed a 300+ cage mouse facility, optimizing genotyping, breeding, and husbandry procedures to support experimental needs.

SmartTrans Ambulance

Emergency Medical Technician (EMT)

Towson, MD
May 2021 – Apr 2022

- Delivered critical care providing immediate life support and administering essential first aid, leading to improved patient outcomes.
- Stabilized patients through the administration of authorized medications, strictly following medical protocols to ensure the highest standard of care.
- Engaged in advanced medical training, continuously refining emergency response skills and staying updated on best practices.

BrightView Assisted Living Home

Resident Assistant

Baltimore, MD
August 2019 – February 2021

- Delivered high-quality support for activities of daily living and personal hygiene management, improving resident well-being.
- Facilitated safe resident mobility, reducing incidents of falls and injuries through careful monitoring and assistance.
- Maintained meticulous records of resident care, ensuring seamless communication with healthcare providers and family members.
- Actively pursued ongoing education, enhancing skills in senior care and providing residents with updated, compassionate care.
